

PE1678/GG

Petitioner submission of 27 September 2019

As from our petition meeting yesterday and having now reviewed the Video Clip,

I would like to clarify my evidence to the MSP, Maurice Corry who asked me “**should there be a National Ranger Service.?**” What I omitted to say is that Scotland currently has a National Ranger Service which was evolved from the formation of establishing Ranger Services in Scotland back in 1974

It was visionary by the Countryside Commission for Scotland (CCS) who created the following

Example:

Where today Scotland currently has sixty various Employers and ninety one Ranger Services across Scotland, which were unified through grant structure and National identifiable logo and Training of Rangers, the first Rangers were encouraged by CCS to establish our Association to enhance the national delivery of the profession

It was identified at the meeting yesterday that some bridges require being built with employers. Within marketing, I see an opportunity to promote the unique structure we already have in Scotland
