

**PE1837/U**

Petitioner submission of 8 February 2021

There has been various submissions made. The summaries are reflecting heavily on a commissioner role.

I would like to ensure the focus stays on the petition points such as:

1. Direction on who provides autistim support, especially for people who do not have a learning disability or mental health concern.
2. To invest in local autism support teams for every Health and Social Care Partnership, using the recommendations of the Microsegmentation Report to literally saves hundreds of millions of pounds each year.
